LOWLANDS

There's more distillation in the Lowlands than any other Scottish region, but its days as a significant single malt player are consigned to history. This is the home of the blend, and of the large quantities of grain whisky which form its foundation – but a few producers keep up the trademark light and grassy Lowland malt style.

AILSA BAY (ALE-sah Bay)

Ailsa Bay was built within Girvan grain distillery in 2007 to produce malt whisky for William Grant's range of blends. The first single malt, a heavily peated no-age-statement release, was launched in February 2016, after eight years of operation.

- | | | | |

| 1154 | Ailsa Bay | 48.9% | £17.80 |
| | Creamy with sherried fruit, a touch of honey and spice on the nose. A sweet, malty, marmalade-like taste with a mellow malty and citrusy finish. | | |

ANNANDALE (ANNAN-dale)

Annandale Distillery was established in 1836 by George Donald and was later bought by Johnnie Walker in 1893 and was closed down in 1924. It has re-opened in 2014 and first cask of unpeated whisky made the news and was put up for sale for a staggering £1million.

AUCHENTOSHAN (OCHun-TOShun)

Founded by Irish refugees in 1825 on the outskirts of Glasgow, Auchentoshan is one of the last active distilleries in the Lowlands. In common with other Lowland (and Irish) whiskies, Auchentoshan malt whisky is distilled three times (as opposed to most Scottish malt whisky, which is distilled twice). This triple-distillation has the effect of softening the flavour and body of the end product.

| 3259 | Auchentoshan American Oak | 40% | £13.30 |

BLADNOCH (*BLADnoch*)

Scotland's most southerly working distillery has an echoing connection with Northern Ireland. Built in 1817, the distillery as sold in 1911 by the founding McLelland family to the Belfast based whisky merchant Dunville & Co., who made their own whiskey in Ireland but were in need of stocks of Scotch to fulfil customer demand. As of July 2016, Bladnoch was scheduled to resume production by spring of 2017, with much new equipment, including four 5 tonne mash tuns, six Douglas Fir wooden washbacks, two 12,500 litre capacity wash stills, two 9,500 litre capacity low wines stills, and a steam boiler that will be fuelled with LPG. In late 2016, Prior officially relaunched Bladnoch, and announced three new expressions, created from aged stocks by master distiller Ian MacMillan: the no age statement Samsara, the 15-year-old Adela and the 25-year-old Talia.

| | | | |

| 3878 | Bladnoch Adela 15 Yr Sherry Cask Adela is the 15-year-old offering from the revitalised Bladnoch distillery in the Lowlands. Matured in oloroso-sherry casks, this is rich and sweet with notes of dark chocolate, dried fruit, coffee and liquorice. | 46.7% | £29.90 |

GLENKINCHIE (*glen KINsee*)

Founded in 1825 in the outlying farmland around Edinburgh as Milton distillery (before being renamed in 1837), Glenkinchie languished in obscurity for over 150 years before becoming an international brand almost overnight at the end of the 1980s. Prior to this time, the distillery's main claims to fame were as one of the five original Lowland distillers to found Scottish Malt Distillers Ltd; and as one of very few distilleries to continue production throughout the Second World War.

| | | | |
|------------|---|-------------------|--------------------------------|
| 833 | Glenkinchie 12yr The nose is quite light, yet fragrant, fresh cereal and grist, some barley sweetness and a nutty note. The palate is very fruity with notes of Madeira and sweet stewed fruits. A hint of calvados and tannic oak lining the mouth. The finish is of medium length with notes of cereal and a fresh greenness. | 43% MEM | £16.50 £14.85 |
| 834 | Glenkinchie 2003 Distillers Edition This 2003 vintage Distillers Edition from Glenkinchie has been finished in Amontillado sherry casks for an extra burst of rounded flavour. This was aged for more than a decade before being bottled in 2015. | 43% | £21.10 |

1126 Glenkinchie 20yr 58.4% **£47.40**

A rare & unusual bottling, this Glenkinchie is a muscular 58.4% & has had 10 years in refill casks & then another 10 in brandy casks. A beautiful whisky & near impossible to find.

INVERLEVEN (*In-ver-LE-ven*)

Inverleven was part of the gigantic distilling complex built in Dumbarton in 1938 by the famous Canadian distillery company Hiram Walker, makers of Canadian Club, to provide filling for their newly-acquired Ballantine's blend. Hiram Walker's had also bought Miltonduff and Glenburgie for the same purpose, and later acquired Scapa. During their operating lifetimes all the production at Dumbarton, Lomond and Inverleven went into Ballantine's and there were never any official bottlings of either of the single malts. However, enterprising independent bottlers have released a handful of bottlings of Inverleven, which has been described by Michael Jackson as "Perfumed, fruity, oily. With a summer salad when young; with nuts at Christmas when older."

897 Inverleven 1973 36yr 'Deoch an Doras' 48.9% **£57.55**

A 1973 vintage whisky from Inverleven, a malt distillery that operated from within the Dumbarton grain distillery complex until 1991. This is part of Chivas Brothers's Deoch an Doras series, roughly translated as 'One for the road', and was bottled in 2011 at 37 years old.

LADYBURN (*Mothballed*) (*lady burn*)

A short lived, 'Rare Ayrshire' whisky, closed in the mid-1970s. There have been both official and independent bottlings released, but they remain few and far between, making whisky from the distillery sought-after and very collectible. Part of the Girvan complex built by William Grant's in the early 1960s to provide filling for its 'Grant's' blend, Ladyburn began operation in 1966, but closed just nine years later.

925 Ladyburn 1973 27yr 50.4% **£223.00**

The nose is quite light and dry with notes of heather roots, a touch of wood, waxy honeysuckle and blossom. There is a delicate barley sweetness. The palate is quite dry and of medium-body. There is a hint of zesty citrus with honeyed sweetness, a touch of spice and pepper with a pungent honeycomb waxiness. The oak develops with dryness and chewy tannins. The finish is long, with a touch of acacia honey sweetness and dry peppery oak. Only 3000 bottles produced.

MEM £200.70

ROSEBANK (*Mothballed*) (*rose bank*)

Generally considered to be the best of the closed Lowland single malt distilleries, whiskies from Rosebank are increasingly scarce. A lost classic. Young Rosebank's tend to be floral and aromatic; older expressions can be more robust and spicy, but with glorious depth. Stocks of the last Flora and Fauna batch (awarded 95 points in Jim Murray's Whisky Bible 2007) are still available, along with several independent bottlings, but prices for what is generally acknowledged as the best Lowland malt will continue to rise as the supply of maturing casks runs out. Re-opening soon!

1043 Rosebank 12yr 'Flora & Fauna' 43% **£47.40**

This remains the classic Lowland, with delicacy and finesse without ever becoming boring. Floral and fresh with an attractive zing, it is a delightful springtime or summer dram.

1051 Rosebank Ceramic 15yr 1970s 43% **£100.45**

Sadly closed in 1993, the distillery was known for producing a richer and more complex style than it's Lowland neighbours and bottlings are much sought after. We estimate this was bottled in the 1970s.

MEM £90.40

ST. MAGDALENE (Mothballed) (st MAGdelain)

A legendary lost distillery, also known as Linlithgow, closed in 1983. Despite a capacity of around 200,000 gallons a year of production, there were no official bottlings during its lifetime, and most malt fans had barely heard of it until a series of stunning Rare Malt bottlings (as St. Magdalene) in the mid-to-late 1990s. It is now one of the most lamented lost distilleries (the buildings have been converted to private housing), and Rare Malt bottlings are hungrily seized upon by aficionados and collectors alike.

| | | | |
|-------------|--|--------------|----------------|
| 1073 | St Magdalene 1964 17yr Connoisseurs Choice G&M A very rare bottling from St Magdalene distillery. | 1074 | St Magdalene 1979 19yr 'Rare Malts Series' St Magdalene's 1979 entry in the Rare Malts series. This is one of the few official bottlings that made it out of the distillery. It's an excellent malt, picking up a stack of 90+ scores from the Malt Maniacs. | 63.8% | £189.75 |

HIGHLANDS

Scotland's largest whisky region boasts a dizzying array of styles, from rich and textured to fragrantly floral, as befits an ever-changing landscape of coastline, moor and mountain. Even without the famed Speyside enclave, you'll find some of whisky's most famous names here – and some of its most fiercely individual spirits.

ABERFELDY (*aberFELdy*)

Aberfeldy Distillery is the home of the highly-acclaimed Aberfeldy 12 and Aberfeldy 21 single malt Scotch Whisky. The only other element missing from this inviting image is a single malt. Relishing a whisky while penning notes in your tatty game book is the tranquil moment that rounds off a challenging day impeccably. An experience shared with a Rigby single malt is an experience doubled." | 43% | £31.40 |

BRORA (Mothballed) (*BRORa*)

A cult malt with a sad story to tell. Originally known as Clynelish, this distillery became a victim of its own success when a new distillery was built alongside it to increase capacity only a few years before the slump of the late Seventies and early Eighties. The new distillery took over the name, and the old distillery was renamed and limped on until being mothballed in 1983.

- | | | | |
|------------|--|--------------|----------------|
| 674 | Brora 30 Year Old - 3rd Release (Special Release 2004) Gorgeous fruit, with much less emphasis on smoke & peat this time. One of the best whiskies we've ever tasted here at Boisdale and that is no mean feat. Only 3000 bottles made and unfortunately not many left. | 55.7% | £189.75 |
| 671 | Brora 1972 Connoisseurs Choice G&M Bottled 2003 One of several legendary 1972 Brora's bottled by Gordon & MacPhail for their Connoisseurs Choice Range. CLYNELISH (*cleinLISH*)

Built in 1967 in a rural setting in the Northern Highlands opposite its now-silent sister distillery, Brora, Clynelish has continued to produce a muscular, slightly peaty whisky much valued by blenders – it is one of the base spirits for the excellent Johnnie Walker Gold Label.

| | | | |
|-------------|--|-------|---------------|
| 1113 | Clynelish 14yr Rich and complex, this unfolds slowly and has richness, balance, texture, sweet waxy fruits and a lift of smoke. Some package. | 46% | £16.40 |

Dalwhinnie was the highest working distillery in Scotland between 2002 and 2008, but the re-opening of Braeval in July of that year has robbed the distillery of that title. This pretty and immaculately maintained distillery opened for business in 1825, just one year after legitimate distilling on a large scale was legalized. GLENESK (Mothballed) (glen ESK)

Glenesk was something of a chameleon during its lifespan, switching between malt and grain distillation and having its name changed frequently. Glendronach was founded in 1826 by James Allardice (also spelt Allardyce and Allardes), and almost completely destroyed by fire a decade later. After the rebuild, Allardice - a colourful character - is rumoured to have accidentally ensured the popularity of his whisky in Edinburgh in the 1840s by gifting a quantity of it to some local prostitutes after a failed sales trip to the city.

GLEN MHOR (Mothballed) (glen VHOR)

The distillery was founded in 1892 by John Birnie and John Mackinlay, named after the tectonic rejection of the Great Glen in which it lay. In 1972, the distillery was sold to *Distillers Company Limited* (DCL) by William Birnie, the son of John Birnie. In 1980, the malthouse was closed down for reasons of cost and the malt moved from outside. On 8 March 1983 the last burn was made, the final closure of the distillery on account of its unprofessionality. The water from the distillery belonging to the Northern Highlands region came from the River Ness, as is the case with Glen Albyn.

GLENDULLAN (*glen DULLan*)

The modern Glendullan distillery was constructed in 1972 next door to the previous distillery, from the late 1890s and whose whisky had found favour at the court of King Edward VII in 1902. The two distillery ran concurrently until 1985, when the original distillery was mothballed and converted into a workshop for distillery engineers. During this time, the malt from the two distilleries was vatted together, a practice that would not be permitted these days.

Glenfiddich is a Speyside single malt Scotch whisky owned and produced by William Grant & Sons in Dufftown, Scotland. Glenfiddich means ‘Valley of the Deer’ in Scottish Gaelic, hence the presence of a stag symbol on Glenfiddich bottles. The Glenfiddich Distillery was founded in 1886 by William Grant in Dufftown, Scotland, in the glen of the River Fiddich. Glenfiddich whisky is produced at the Glenfiddich Distillery in Dufftown. The water source is the Robbie Dhu springs. Glenfiddich is matured in oak casks such as rum casks from the Caribbean (in the case of 21-year-old Gran Reserva), Bourbon whiskey barrels from America (Ancient Reserve), or sherry butts from Jerez in Spain. Glenfiddich is the world's best-selling single-malt whisky and also the most awarded at the International Spirits Challenge.

***GLEN KEITH** (glen keith)*

Glen Keith is a distillery built by and owned by Chivas Brothers within eyesight of their centre piece distillery, the picturesque Strathisla Distillery. Glen Keith is a modern distillery. When it opened in 1958, it was the first new distillery to open in Speyside since the great whisky crash of 1898. It therefore contrasts markedly with Strathisla - the oldest in Scotland. The output of the distillery was originally used in blends such as Chivas Regal, Passport and 100 Pipers but Chivas Brothers also used it as a laboratory for experiments with innovations in production and processing, for example developing their own strains of yeast.

GLENLOSSIE (*glen LOSsee*)

Glenlossie is a whisky brand near Elgin, Scotland. The distillery was founded in 1876 by John Duff. The water of the distillery belonging to the Speyside region comes from Bardon Burn, as is the nearby Mannochmore distillery. Given that Glenlossie was named as one of only twelve 'top class' malts by blenders in 1974, it is perhaps surprising that the distillery is so little-known. The reason, however, is easy to determine - the blender's high regard means that demand for Glenlossie remains extremely high, and as a result less than 1% of the distillery's output is kept back for single malt.

The Glenrothes is a single malt Scotch whisky, produced at the Glenrothes Distillery, beside the Burn of Rothes in the Speyside region. Glenrothes is used in blended scotch whiskies such as Cutty Sark and The Famous Grouse. The Glenrothes is different from many other single malts in that since 1993 the bottlings are not determined by age but by vintage. The Glenrothes is mainly matured in Spanish ex-Sherry casks, and some ex-Bourbon casks. The house style is a warming, mouth-coating creamy spirit, with the classic Speyside "pear drop" character. Thanks to its ageing and production, Glenrothes whisky is known for its spicy, rich character.

***GLEN SPEY** (glen spey)*

The Glen Spey distillery is a single malt Scotch whisky distillery in Rothes, Aberlour, Banffshire at the centre of the Speyside whisky producing area of Scotland. Glen Spey (along with Glenlossie and Strathmill) continues to use 'purifiers'. Purifiers act as small condensers, returning a proportion of the alcohol vapours back to the pot to be re-distilled. So, this would increase the amount of 'reflux' within the pot stills. This results in a lighter spirit.

Macallan is the most sought-after whisky for collectors, and here you'll find a huge range of Macallan Scotch whisky. Over the past four decades, Macallan has built probably the best reputation for quality malt whisky; rare expressions can change hands for thousands of pounds, and prices for such bottles are continuously going up. Macallan has built its enviable reputation by focusing on the fact that they mature their core range in 100% sherry oak barrels.

The whiskies produced on the Islands are extremely varied and have few similarities, though can often be distinguished from other whisky regions by generally having a smokier flavour with peaty undertones.

JURA (jura)

Jura distillery is a Scotch whisky distillery on the island of Jura in the Inner Hebrides off the West Coast of Scotland founded in 1810. It was dismantled in 1901 and rebuilt on the same site in 1960. The new distillery was producing malt more akin to the Highland style rather than the heavily-peated whisky of near-neighbours Islay.

TALISKER (TAlisker)

Talisker distillery is an Island single malt Scotch whisky distillery based in Carbost, Scotland on the Isle of Skye, founded in 1830. The malted barley used in production comes from Muir of Ord and is most frequently matured in American oak casks. Additionally, the water used for production, from Cnoc nan Speireag (Hawk Hill), flows over peat which adds additional complexity to the whisky.

CAMPBELTOWN

Campbeltown was once a thriving malt whisky region of no fewer than 34 distilleries – no mean feat for a small and remote settlement at the bottom of the long Kintyre peninsula. Now only three producers remain, but they make up for their paucity by producing five distinctive malt whiskies between them. Campbeltown's whisky-making fame endured the length of the 1800s, and even after its 34 distilleries were all but halved in number by a slump in the 1850s, its distinctive style was still highly prized at the dawn of the 20th century. What followed was a catastrophic fall from grace, brought about by a number of factors, including improved transportation links to the rival distilleries of the remote north, and a decline in quality as unscrupulous distillers cut corners and churned out mass-produced rotgut.

GLENGYLE (*glen GUYull*)

William Mitchell founded the original Glengyle distillery in 1872, and subsequently sold it in 1919. In 1925 the distillery was closed down. Over 75 years later, Mr Hedley Wright, the current chairman of J&A Mitchell & Co Ltd and the great-great nephew of William Mitchell, bought the old buildings, which had been lying empty for several years, and made the re-opening of Mitchell's Glengyle Distillery in 2004 a reality.

GLEN SCOTIA (*glen SCosha*)

Glen Scotia distillery was founded in 1832 in Campbeltown, Scotland. Glen Scotia is one of the smallest distilleries in Scotland. SPRINGBANK (*springbank*)

Springbank distillery is one of the last surviving producers of Campbeltown Single Malts. The distillery, located on the southern Kintyre peninsula, produces three distinct types of single malt Scotch whisky. Springbank is one of only two distilleries in Scotland to perform every step in the whisky making process, from malting the barley to bottling the spirit, on same premises. Nearly all of its whisky is sold as a single malt, with little of it finding its way into blends.

It was bottled for the Chieftain's range by Ian Macleod with an outturn of just 398 bottles. | 54% | £200.90 |

ISLAY

The southernmost of its island chain, Islay is known as ‘The Queen of the Hebrides’ – and is certainly the reigning monarch of a typically smoky, peaty style of single malt whisky. But there’s much more to this beating heart of distillation, which has eight active producers – and more to come. Amid all the talk of Islay’s famous active distilleries, the island also boasts one of the most legendary of ‘lost’ producers: Port Ellen, which closed its doors in 1983. It’s strongly smoky, turfy flavours were an artist’s study of the most typical Islay style and its whiskies remain among the most sought-after.

ARDBEG (arɒBEG)

Ardbeg Distillery is a Scotch whisky distillery in Ardbeg on the south coast of the isle of Islay, Argyll and Bute, Scotland, in the Inner Hebrides group of islands and was founded in 1815. It produces a heavily peated Islay whisky and uses malted barley sourced from the malting's in Port Ellen. Ardbeg seldom release whiskies with age statements. Ardbeg often bottles its whisky at a higher alcohol by volume (abv) than the minimum 40%, and they no longer chill filter their whisky. Both of these measures are thought to yield a more full-flavoured whisky.

| | | | |
|-------------|--|---------------------|--------------------------------|
| 609 | Ardbeg 10yr For peat lovers, Ardbeg 10 Year Old is probably the highest-quality 'entry-level' single malt on the market, and the distillery many Islay connoisseurs would choose as their favourite. A whirlwind of peat and complex malty flavours. Whisky Bible Awards 2012: Best Single Malt Scotch of the Year, 10 Years and Under | 46% MEM | £15.45 £13.90 |
| 3654 | Ardbeg An Oa The first addition to Ardbeg's ongoing range for a decade when introduced in 2017, An Oa is a combination of spirit aged in Pedro-Ximenez sherry casks and bourbon barrels. Married in a French-oak marrying vat, this is rounded and smoky with notes of toffee, aniseed, date and banana. | 46.6% MEM | £18.20 £16.40 |
| 617 | Ardbeg Uigeadail A fine drop of Ardbeg bottled at cask strength. A marriage of Ardbeg from bourbon barrels and sherry butts which gives a sweet and smoky finish to this malt. Uigeadail is the loch from which all Ardbeg water flows. An absolutely stunning whisky, and following the demise of Airigh nam Beist, this probably represents the best value in the core range. | 54.2% | £20.70 |
| 615 | Ardbeg Corryvreckan As a replacement for the much-loved 1990 Airigh nam Beist, Ardbeg Corryvreckan had some pretty big shoes to fill, but the good news is that this is a belter, winning World's Best Single Malt Whisky at the World Whisky Awards 2010 and Best No Age Statement Scotch from Jim Murray's Whisky Bible. | 57.1% | £23.15 |
| 613 | Ardbeg 1998 'Almost There' Following on from Very Young and Still Young, Ardbeg Almost There showed the final stage in the evolution of young cask-strength Ardbeg 1998 before it blossomed into the Renaissance 10 yr-old. As you would expect, this is a mellower, more rounded, better balanced dram than the younger incarnations. | 54.1% | £39.70 |
| 614 | Ardbeg Blasda One of the most talked-about releases of 2008: Ardbeg Blasda is a lesser-peated version of many people's favourite Islay malt, being just 8ppm in bottle (as opposed to the standard 10yo's 23ppm). | 40% | £46.30 |
| 616 | Ardbeg Supernova 2010 This is the peatiest Ardbeg ever at over 100ppm. BOWMORE (*bowMORE*)

Bowmore was the first of Islay's distilleries to receive a licence, springing fully-formed into official existence in 1779. It is likely that the founder of the distillery, one William Simson, had been distilling in Bowmore since shortly after his arrival in 1766, at a time when Daniel Campbell the Younger (the laird of the island) was expanding the village into the island's capital. The distillery passed through four owners before 1963, when it was bought by the Morrison family, who sold to the Japanese whisky company Suntory in 1994.

BRUICHLADDICH (*BRooich-LADDich*)

Bruichladdich Distillery is a distillery on the Rhinns of the isle of Islay, the westernmost part of the island and was founded in 1881. The distillery produces mainly single malt Scotch whisky, but has also offered artisanal gin. One interpretation of the Gaelic word Bruichladdich is "stony shore bank", referring to a post-glacial raised beach, though an alternative, perhaps more pertinent translation may be "rocky lee shore". All the distillery's whiskies are sold as single malts, with those designated Bruichladdich being unpeated. All barley used is exclusively Scottish, some of which has been grown on Islay since 2004.

| | | | |

(peated to 107 PPM) Deliberately stripped back to an ex- American oak maturation, aged just 5 years old, the .1 edition exposes the structure and presence of the Octomore spirit. Combining smoke with a modest maturation, this 10.1 first and foremost demonstrates the true potential of a considered, patient distillation. | 59.8% | £32.15 |
| 678 | Bruichladdich 15yr – 1st Edition One of the best ongoing bottlings from this great distillery. This is more lightly peated, allowing its fresh, coastal maritime character to shine through. This is a real gem, the extra aging in Sauterne casks adds a beautiful sweetness. | 46% | £34.30 |

BUNNAHABHAIN (*boonaHAAven*)

The Bunnahabhain distillery lies on the peaceful, sheltered north-eastern coast of Islay, the most southerly of the Hebridean Islands. Built in 1881 its name comes from the Gaelic, Bunnahabhain (Bu-na-ha-ven), meaning 'mouth of the river', a reference to the Margadale, the river from whose clear Spring waters the whisky is distilled. A very lightly peated malted barley is then used for distillation before ageing in cask for 12 years. This is why Bunnahabhain is known as a more subtle of the Islay Malts, with a distinctive oiliness and whiff of sea air that set it apart from the almost universally peaty whiskies that are produced on the island. While the distillery does now also release smoky drams, it's the distinctively oily and almost entirely unpeated whisky that has made its name with whisky fans around the world.

|-------------|--|-------|---------------|
| 698 | Bunnahabhain 12yr A giant leap forward for Bunnahabhain 12yo, this edition was launched in summer 2010 with a jump in strength to 46.3% and a declaration of no chill-filtration and no added colouring. CAOL ILA (*COOL-eelah*)

Caol Ila Distillery is a Scotch whisky distillery near Port Askaig. Caol Ila is derived from Gaelic for "Sound of Islay" in reference to the distillery's location overlooking the strait between Islay and Jura. It was founded in 1846 by Hector Henderson. Caol Ila is one of the lighter Islay whiskies, pale in colour, with peaty, floral and peppery notes. In addition to being sold as a single malt, it is used heavily (around 95% of their production) in blends such as Johnnie Walker and Black Bottle. Since 1999, the distillery has also produced a non-peated "highland spirit".

KILCHOMAN (kill-ho-man)

The Kilchoman distillery is situated on the western side of Islay, near the small settlement of Kilchoman. The location made it the most westerly distillery in Scotland, until the Abhainn Dearg Distillery started distilling on the Isle of Lewis. The distillery began production in June 2005 and uses barley grown on site at Rockside Farm and malted at the distillery, as well as malt from the Port Ellen maltings and releases separate bottlings depending on the source of the grain. The whisky will primarily age in bourbon casks, though sherry casks will also be employed.

LAGAVULIN (lagavoolin)

The distillery of Lagavulin officially dates from 1816. Lagavulin is almost exclusively matured in ex-bourbon casks, meaning its fiery, uncompromising smoke and salted fish character comes storming out of the glass unhindered. Lagavulin's richly peaty process water runs down the brown burn to the distillery from the Solan Lochs in the hills above the distillery. The barley used to distil Lagavulin is malted at nearby Port Ellen and has a strong peat "reek" - it has perhaps twenty times as much exposure to peat smoke as a typical Speyside, Cragganmore. It has converted untold numbers of people to whisky-drinking and remains the firm favourite of countless malt fans worldwide.

It continued in production throughout the 1970s and was closed in 1983, where it now houses a malting which continues to supply all Islay distilleries. Port Ellen is a versatile malt, with considerable differences of style evident between different bottlings. Some sherry-casked Port Ellen can be beautifully rich, spicy, sweet and leathery; bourbon and refill casks often show a more austere, peppery medium-weighted style.

Roughly nine out of 10 bottles of Scotch sold around the world are blends – that is, a mix of grain and single malt whiskies. These products are the lifeblood of the industry and the liquid expression of an art form that borders on alchemy: combining myriad components to create one harmonious and consistent whole.

John & William Hardie began their quest to create the perfect Blended Scotch Whisky more than 150 years ago. In 1888, using only the finest and rarest malts, they succeeded in creating what was considered to be superior to all other blends; THE ANTIQUARY. The name is taken from the famous Gothic novel written by Sir Walter Scott, redolent with family secrets, stories of hidden treasure and hopeless love. Today, the story continues with our range of premium Blended Scotch Whisky which is, quite simply, a cut above. From the Tomatin distillery in the village of Tomatin. Its whisky is classified as being from the Highland region, as it is 25 minutes south of Inverness.

A smooth, well-balanced deluxe blend with the mellowness expected from a top-quality brand. Each whisky has a minimum age of 12 years, selected to combine all the strengths and subtleness of Scottish whisky at its best.

Blended malts are, as the name suggests, a combination of two or more single malt Scotch whiskies – unlike blends, there's no grain whisky allowed here. Instead, you have some of the most innovative Scotch whiskies around, from Islay-influenced smoke and seaweed to the typical Speyside character of rich, spiced fruit.

GRAIN WHISKIES

To the uninitiated, grain whiskies are the filler in blends, knitting together the real flavour from the single malts and – since they're typically cheaper to make – keeping the price down. Unfair. Apart from giving real flavour and texture to blends, well-made grain whiskies have a distinct character all their own.

CALEDONIAN (Mothballed)

Caledonian was founded in 1855 by Graham Menzies in Edinburgh's Haymarket district as the Edinburgh Distillery and was used to make Grain Whiskey. In 1884, it merged with the Distiller Company Ltd (DCL) and was operated by Scottish Grain Distillers Ltd from 1966. The closure took place in 1988. In 1997, the production facilities were partially demolished.

CAMBUS (Mothballed)

The Cambus distillery dates back to the early 1800s - it was opened in 1836 in a village that shares its name near Alloa. Here it quietly produced its whiskies, becoming one of the first members of the Distillers Company Ltd. In 1913, a fire destroyed much of the distillery, forcing it to close until 1938. Cambus produced grain whisky, a lot of which made its way into blends, though you can still find independent bottlings of their single grain if you're lucky (it's fantastic stuff). The distillery was closed in 1993 by its owner, UDV.

CAMERONBRIDGE

Though there is little hard evidence, Robert Haig was said to have operated the earliest whisky distillery and certainly the earliest ever referenced. It was in 1655, that he was frowned upon by church elders for using his still on the Sabbath and was summoned to appear before the Kirk Session. In 1824, one of his descendants, John Haig, built the Cameron Bridge distillery in Windygates in the Lowlands and it was one of the first distilleries to produce grain whisky.

| 1006 | Death's Door New Make Spirit – Harvest 2011 A white dog from Death's Door, this is made with 80% wheat from Washington Island and 20% malted barley from Wisconsin. Aged in oak barrels for a short time to impart richness, this combines notes of vanilla, sweet fruit and mixed herbs | 40% | £15.50 |
| 1339 | George Dickel No. 8 The 'other' Tennessee whiskey, George Dickel's small scale means it lives in the shadow of the Jack Daniel's colossus. This is unfair, as it is a great whiskey in its own right. | 40% | £16.00 |

| | | | |
|-------------|--|-------------------|--------------------------------|
| 3782 | Woodford Reserve Double Oaked An interesting twist on Woodford Reserve's classic straight bourbon. The whiskey is first matured in new charred white oak barrels, as usual, but before bottling is transferred to special heavily toasted, lightly charred finishing barrel. This gives it quite a different flavour to normal, with lots of spicy oak coming through on the palate. | 43.2% | £18.65 |
| 6540 | Van Brunt Stillhouse American Whiskey Full of youthful energy, this mixed-grain American is defined by wholesome cereal, herbal high notes and a hint of tobacco on the finish, all set against a surprising malty backdrop. Unashamedly direct, you might be tempted to mix it, but to dilute this would be a mistake – pour it, add a dash of water and appreciate it for what it is: American whiskey by name and nature. | 42% | £16.75 |
| 6542 | Van Brunt Stillhouse Rye Spirit Enter: a particularly exciting aroma – look out for a flourish of fresh spring flowers on the nose. The palate is deeper, with chocolate and coffee notes lifted by a touch of spice and opening up into bright cherry Bakewell flavours toward the end. A vibrant rye whisky which would sit comfortably at the base of a Manhattan. | 42% | £16.75 |
| 1367 | Sazerac Straight Rye The whiskey is named for the Sazerac Coffee House in New Orleans, birthplace of the famous – and sublime – Sazerac cocktail. The Coffee House was acquired by Thomas H Handy, owner also of Peychaud's Bitters. Originally, he sold bottles of the Sazerac cocktail, which was originally made with Cognac. Today, this glorious libation is produced at the Buffalo Trace distillery. | 45% | £17.75 |
| 3784 | Jack Daniel's Single Barrel Rye Jack Daniel's Single Barrel Rye is the brand's first new mash bill in 150 years. The use of 70% rye adds extra spice to notes of ripe fruit & toast. | 45% | £17.80 |
| 1300 | Balcones Brimstone A smoky whisky with a difference. Firstly it's made in Texas by Balcones and secondly the smoke comes from a secret process involving Texas Scrub Oak. This is not smoky whisky like you've had before – a mix of campfires, fruit and youthful corn. | 53% | £22.50 |
| 1337 | Hudson Four Grain Bourbon Hudson Four Grain bourbon is made using the Tuthilltown distillery's unique recipe of the common grains used for a bourbon mashbill - corn, rye, malted barley and wheat. Like the company's flagship Baby Bourbon, Four Grain is aged in small casks to speed up maturation. | 46% MEM | £24.70 £22.25 |
| 3776 | Jack Daniel's Sinatra Select A special edition from Jack Daniel's, celebrating one of the whiskey's biggest fans – Frank Sinatra. For more than 50 years, JD was a firm favourite of Ol' Blue Eyes, regularly appearing in his hand as a tippie of choice. This release is not only bottled at a stronger 45%, but is also partly matured in 'Sinatra barrels', grooved on the inside to allow more wood/spirit interaction, developing a deeper and more intense flavour. | 46% | £25.95 |

GLOSSARY

ABV - alcohol by volume is the alcoholic strength measured as the percentage of alcohol present.

Age Statement - gives the age of the youngest component of the whisky. In Scotland the minimum that this can be, by law, is 3 years. Maturation stops at bottling.

Angel's Share - the tiny portion of alcohol that evaporates from a cask during maturation. This is approximately 2% of the contents of a cask per year in the UK.

Blended (vatted) Malt - a whisky made up of two or more single malts which have been blended together. This way the drink can be more consistently 'tuned' to bring out a particular character. Consequently the whisky can taste slightly less hard-core, so can be a good place to start for beginners. No grain whisky allowed.

Blended Scotch - a whisky which contains a variable amount of blended malt and grain whiskies. Usually there will be about 40% malt to 60% grain. The final taste is called a 'top dressing', which is a highlight in itself.

Cask Strength - also known as barrel proof, this describes the ABV use for a whisky during its time in a cask when maturing. This usually knocks around the 60-65% mark.

Casks - the wooden barrels used to mature whisky, usually made from oak. They come in all sorts of shapes and sizes.

Charring - burning the inside of the cask. The blackened result accelerates the leakage of natural compounds from the wood to the whisky.

Chill Filtration - when natural substances which make whisky go cloudy are removed before bottling. Metal meshes and chilling are involved, in a process which some would describe as 'a faff'.

Cooper - the highly skilled person who makes the casks.

Distillation - the process wherein the whisky wash is heated in the still, causing the alcohol vapours to evaporate, travel along the lyne arm, and condense back into a liquid again. Whisky is often double or triple distilled.

Distillery - the production site of whisky, the true birth place.

Dram - the traditional Scottish name for a glass of whisky.

Fermentation - the process of converting sugars into carbon dioxide and alcohol, with the addition of yeast and enzymes. Once there is enough alcohol, the yeast dies.

Floor Malting - an old school way of producing malted barley, by soaking it in water and laying it out on a wooden floor for about a week until germination starts to happen. This method is labour intensive as the barley is turned by hand.

Graff - any grain husks or residue left over after mashing, this is usually then recycled as cattle feed.

Grain Whisky - the raw materials here tend to be unmalted barley, wheat or maize.

Grist – malted barley which has been ground beyond recognition, into a powder which can be added to water to become mash. The natural sugars can then dissolve into the liquid.

Malt – barley which has been encouraged to germinate by being soaked in water, before being dried out to stop it germinating any more. Basically, we mess the barley around to the point where the starch is converted into soluble compounds which makes fermentation possible.

Malt Kiln – the huge oven of a room in which barley is heated to stop the germination process and remove moisture, in preparation for milling. These can either be fuelled by peat, coal or oil.

Malt Whisky – the raw base of malt whisky is barley malt, fermented with a bit of yeast for good luck. Generally this kind of whisky is seen as far superior to the common grain whisky used for blends.

Marrying – mixing two types of whisky together.

Mash Tun – the vessel in which the mashing occurs.

Mashing – this is the bit where grist is added and crushed in warm water, so that the natural sugars can dissolve to make a syrupy solution before fermentation. All of this takes place in a large tank called a mash tun, and the solution is called wort. The wort is eventually passed to the washback tank ready for fermentation.

Master Blender – the lucky devil who selects and mixes whiskies of different origins to achieve enviable flavour profiles.

Maturation – the time taken for a whisky to gain its optimum level of character from the wooden cask in which it is stored. All sorts of wonderful things happen here; natural oils being passed off from the wood being just one of them.

Milling – grinding the dried malted barley into grist.

Monkey Shoulder – the repetitive strain injury that commonly occurred after floor malting.

Mothballed – the act of closing a distillery indefinitely to be revisited or reused in the future.

NAS – No Age Statement whisky does not reveal its age. In Scotland, it will still be at least 3 years old as this is the minimum legal requirement.

Neat – whisky served on its own, straight up, showing off.

Nose – the aroma of whisky; a spirit so great that it has its own word for ‘smelling’ which is, you got it, ‘nosing’.

Peat – decomposed vegetation which forms a bog, but can then be cut in slices to lace malt kilns during the whisky production. It might not sound gourmet, but peat gives Scotch its smacks of smokiness.

Pot Still – usually made from copper, thanks to magical conductive skills, these are essentially huge kettles, or pots, in which the whisky wash is heated. The vapour runs through the neck and starts condensing in the lyne arm.

PPM – the abbreviation of parts per million, the scientific measurement which represents the amount of phenols present in whisky, which will have been absorbed by the burning of peat.

Proof - traditionally means 'of tried strength and quality', but in basic terms it is typically defined as twice the percentage of alcohol by volume. It's the way Americans like to determine alcoholic strength...so 50% ABV is 100 proof. Or 50% ABV, as you were.

Scotch - whisky that has been exclusively matured and distilled in Scotland.

Scotch on the rocks - the act of enjoying your whisky with ice, otherwise known as whisky suicide.

Single Malt - a whisky by this definition has been produced solely in one distillery, and has not been blended with any ingredients or produce from elsewhere. However, the whisky could contain several whiskies which have been produced over a couple of years.

Tasting notes - describe the flavour of whisky.

Wash - the alcoholic liquid which is used to make whisky.

Wash Still - stills usually operate as double acts and this is the first and largest of the two. The second round of distillation happens in the spirit still.

Washback - the massive stainless steel (or wooden) vat in which fermentation takes place.

Whisky - knowing what whisky is, is a great start to becoming a connoisseur of the stuff. The barley based brilliance bore its name from the Scottish and Irish Gaelic phrase 'uisge beatha', or 'water of life', and gradually worked its way into being just "whisky".

Wort - the questionable word for the sugary solution that goes forward to the fermentation process.
